GZ-GAZE™

Managed Systems

"We'll keep an eye out for you."

With G & Z's Managed Systems Solution, **GZ-GAZE™**, we can ease the burden of managing your network and systems, by remotely monitoring all workstations and servers; making certain your IT environment is functioning as it should, proactively attending to potential problems, and keeping you informed of your company's IT status with periodic reports. This type of service can often help remediate a potential or burgeoning problem before it has a serious impact on your systems. Perhaps your operation may be too small to warrant a dedicated IT professional to do this important monitoring. Perhaps, your operation is large enough to have a dedicated IT staff, but you'd prefer they attend to other important tasks. **GZ-GAZE** may be the perfect solution for you.

- 24 X 7 Monitoring of Network & Systems
- Managed Anti-Malware (Viruses, Spyware, Spam)
- Managed Backup & Disaster Recovery
- Patch Management
- Support for Operating System issues, as well as Word, Excel and Outlook

GZ-GAZE™ is subscription based, so there is **no license to purchase**, and therefore there are **no up front license costs**. Pricing is based on the number of servers and workstations that are monitored, and the level of services needed. Fees are assessed monthly and billed quarterly in advance.
